#### **Non-GAAP Financial Measures**

The company uses certain non-GAAP financial measures in this release, including non-GAAP gross profit, operating loss, net loss, net loss per common share and adjusted EBITDA. Generally, a non-GAAP financial measure is a numerical measure of a company's performance or financial position that either excludes or includes amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with GAAP.

Non-GAAP gross profit, operating loss, net loss and net loss per share exclude stock-based compensation expenses and amortization of acquisitionrelated intangible assets and offering costs expensed, if any. We define adjusted EBITDA as net loss before net interest, taxes, and depreciation and amortization expense, adjusted to eliminate stock-based compensation expense and expense related to the impairment of goodwill and intangible assets. Beginning in the first quarter of 2017, we revised our definition of adjusted EBITDA to also exclude costs not core to our business. The revision to the definition of adjusted EBITDA had no material impact on our reported adjusted EBITDA for the three months ended March 31, 2017 or prior periods. Please note that other companies might define their non-GAAP financial measures differently than we do.

Management presents these non-GAAP financial measures in this release because it considers them to be important supplemental measures of performance. Management uses these non-GAAP financial measures for planning purposes, including analysis of the company's performance against prior periods, the preparation of operating budgets and to determine appropriate levels of operating and capital investments. Management believes that these non-GAAP financial measures provide additional insight for analysts and investors in evaluating the company's financial and operational performance. Management also intends to provide these non-GAAP financial measures as part of the company's future earnings discussions and, therefore, their inclusion should provide consistency in the company's financial reporting.

Non-GAAP financial measures have limitations as an analytical tool. Investors are encouraged to review the reconciliation of the non-GAAP measures to their most directly comparable GAAP measures provided in this release, including in the accompanying tables.
